Sample Company Employee Handbook

This sample PDF contains selectable text for testing a Python PDF parsing and RAG ingestion pipeline.

1. Leave Policy

Employees receive 12 days of casual leave per calendar year. Leave requests should be submitted to the manager at least two working days in advance whenever possible. Approval depends on team requirements.

Exception: If an employee has an emergency, they should notify their manager as soon as possible and submit the leave request afterward.

2. Attendance Policy

Employees are expected to record their attendance at the start and end of each working day. If an attendance record is missing, the employee should inform the HR team within two working days.

3. Work From Home Policy

Employees may request work from home with manager approval. The request should include the date and a short reason. Some roles may require on-site attendance.

4. Sample Benefits Table

Benefit	Allowance	Frequency
Internet support	■500	Monthly
Learning support	■2,000	Yearly
Wellness leave	2 days	Yearly

Testing questions

1. How many casual leave days are provided per year?
2. How should an employee report a missing attendance record?
3. What is the monthly internet support allowance?
